Description :

The horses were given to a young lady with a written agreement that if she could not care for them or did not want them, the horses are to go back to me. Recently I found out that in the young ladies absence a neighbor of mine sent 3 people with 2 trailers pick up the horses I confronted her she denies it, the young lady says she was not there when it it happen and the grandfather of the young lady says he knew nothing about a contract and let the horses go. Seeking the whereabouts of both horses, want to know they are safe. They were never supposed to go anywhere that their well being could not be kept up with and they were not supposed to be separated which appears to be very likely.
