MISSING HORSE

Missing Horse Near San Antonio, TX, 78109

NetPosse ID # : 7528 | **Name** : Susie Q | **Breed** : Quarab |

Description :

Exact Date horse was sold is unknown. The mare was sent on a short term care lease to an individual who then sold her. Individual responsible gave false information for months and became increasingly evasive. I was contacted by several people who know the individual who confirmed the mare had in fact been sold. Susie Q is believed to have been along with an appaloosa gelding, possibly to the same person. She has been diagnosed with Cushing's and needs proper care and medication. 14.2 hands, slender build, half arabian in her late teens. She is a bay with four white socks and a blaze The owners desperately want her back home, they have owned her for many years. Please contact if you have seen this mare. Owner can identify her by scars if necessary.
